## SUMMARY

Experienced Full-Stack Software Engineer with a strong foundation in Computer Science and Mathematics. Leverages a deep theoretical understanding of AI to build robust web, mobile applications, and software library. Expert in utilizing AI-driven tools to optimize development cycles, ensuring rapid delivery and superior code quality.

## EDUCATION

**University of California, Davis** Sep 2024 - Jun 2026  
*M.S. in Computer Science, GPA: 3.9* Davis, CA  
**Coursework:** Database Systems, Operating Systems, Program Verification, Machine Learning, Sublinear Algorithms for Big Data  
**University of California, Davis** Sep 2022 - June 2024  
*B.S. in Computer Science, B.S. in Mathematics GPA: 3.946* Davis, CA  
**Awards:** Dean's Honors List - Fall 22, Spring 23, Winter 24, Spring 24  
**Coursework:** Machine Learning, Data Structures, Algorithms, Operating Systems, Cryptography, Computer Security

## TECHNICAL SKILLS

**Frontend:** JavaScript, React, React Native, TypeScript, Vue.js, HTML/CSS, Tailwind CSS  
**Backend & Database:** Python, RESTful APIs, Django, Flask, MySQL, SQLite, MongoDB, Firebase, Supabase  
**Data Science & Machine Learning:** R, TensorFlow, PyTorch, scikit-learn, keras  
**Tools & Other Languages:** Git, GitHub, Notion, C++, C, Dart, Rust, C#, Go

## EXPERIENCE

**Teaching Assistant** Spring 25, Winter 26  
*UC Davis* Davis, CA  
*Software Correctness* Jan 2026 - Present  

- Guided students during weekly office hours, reviewing assignments, quizzes and exams
- Created an autograder in Python that will check students' homeworks for Hypothesis, Pytest, Z3, and Dafny.
- Graded assignments and provide constructive feedback
- Managed the course Q&A platform (Piazza) to provide support students

*Algorithm Design & Analysis* Apr 2025 - Jun 2025  

- Guided students during weekly office hours, reviewing assignments, quizzes and exams
- Created grading rubrics and solution keys to grade assignments and provide constructive feedback
- Managed the course Q&A platform (Piazza) to provide support students

## PROJECTS

**MATLAB to Python conversion** | *Matlab, Python* Jun 2025 - Present  

- Converted 30+ labs from three Bio/Math courses written in MATLAB to Python to enhance student experience.
- Configured autograders for each lab that can save grader's time by 80%

**EcoTracker - Full-stack Developer** | *Flutter, Firebase, Github* Jan 2025 - Jun 2025  

- Collaborated within a team to build a cross-platform mobile app using Flutter (Dart) and Firebase.
- Utilized GitHub for version control, managing pull requests and code reviews to maintain codebase integrity.
- Engineered a gamified diary system allowing users to log eco-friendly tasks and visualize impact statistics.

**4point0.me - Full-stack Developer** | *Python, APIs, Vue.js, Github* Jan 2024 - Jun 2024  

- Developed scalable backend RESTful APIs using Python (Flask) and built a reactive frontend with Vue.js.
- Architected an academic utility platform for UC Davis students featuring a specific GPA Calculator and Scheduler.
- Integrated Google OAuth 2.0 for authentication and implemented JWT tokenization to secure user data.

## LEADERSHIP & ACTIVITIES

**Project lead & President** | *LikeLion US Davis Chapter* Jan 2023 - Present  

- Led product planning, and cross-functional collaboration as Team Leader & Head Engineer in the LLUS Ideathon and Hackathon projects.
- Drove competition outcomes: earned 1st place in the Ideathon (sign-language translation app) and 4th place out of 50+ teams in the Hackathon with an AI-powered secondhand marketplace platform.
